

TICKET DAO

WHITE PAPER

White Paper V1 3/19/2022

INTRODUCTION

Ticket DAO is a powerful community-driven project/platform that aims to bring tremendous advancements to the cryptocurrency market. Our wish is to create a place for creators and influencers of all kinds to be able to host and offer exclusive content to their fans in exchange for cryptocurrency. This will also be a safe and secure place to allow creators to receive donations via multiple types of cryptocurrency (Ethereum, Solana, BNB...).

The ultimate goal is to establish itself as a reliable project and a household name in the Crypto Stratosphere. We will create a secure DAO that will allow users to do the following:

Ticket DAO desires to be a platform for social media influencers to interact with their fans in a new way, crypto. The blockchain gives people the ability to exchange money over the internet more effectively. NFT's have had real mass adoption without a good website to build NFT's as an effective ticket mechanism. We would like to change that. With unique security measures and wallet improvements we will be able to keep creators content protected to the fans purchasing the NFT (ticket). In protecting your investment, communication is key. Ticket DAO has made public social media accounts to help. These social media platforms are Twitter, Discord, and Telegram. Discord and Telegram will be the primary community center. Look for the Golden Ticket. For the auto-added liquidity by our smart contract, we will regularly give updates on the status of the additions into each respective pool.

ABOUT US

Ticket DAO will have three major functions: mint ticketed NFT's, donate crypto to your creators and influencers, and allow such to offer exclusive content in exchange for most major cryptocurrencies and \$TDT (Ticket Dao Token).

By only applying transaction fees to all cryptocurrencies outside of our own \$TDT tokens, we will encourage all to be donating creators utilizing our DAO's own token. The 5% transaction fee will be returned to the liquidity pool immediately following all transactions. This will promote token usage on the DAO and will create the necessary need for the token to be utilized and be a transactional token.

TRANSACTION FEE

The 5 percent transactional fee will only be applied to users who A) Donate to creators via any token outside of \$TDT, B) Transactions when purchasing NFT tickets not with \$TDT, or C) Purchasing access to a creators exclusive content not with \$TDT.

Any \$TDT transaction will be exempt from the 5 percent transaction fee.

The 5 percent transaction fee will immediately go into the respective transactional liquidity pool.

Ex. Ethereum donation to creator, 5 percent of donation will go to \$TDT Ethereum liquidity pool.

We have decided on this format to ensure boosts into our liquidity pool to promote 1) Token Purchasing, 2) Token Holding, 3) Ever-growing Supply of Liquidity, and 4) Token Preservation. For a long-term Dao to survive we need all of our token holders to feel safe and secure with every purchase and transaction they make.
